Briefing Re: 'Why the Finance N/W is Here'.

HIGHLY CONFIDENTIAL

Dear All,

I thought I'd write to you and give you a bit of background data as to why we are here doing what we are doing and why there is such a heavy emphasis on Finance in PT ;

Going back many years LRH created the FBO N/W which had the purposes and duties as laid out in Finance series 1,6 & 9 . As time went on the FBO N/W got virtually wiped out by the ex-DGFWW H.G Parkhouse (covered in Finance series 27 'Changing Workable Finance Systems') .

Due to this a fantastic loss of potential income has occurred over the last decade . If the FBO N/W had been there functioning we would have built up incredibly large Reserves with which to support Scientology Internationally in the event of Emergency.

Fantastic amounts of money are needed in order to fund various International projects that will benefit all of Scientology - these monies are coming from Sea Org Reserves .

These Reserves are not a bottomless pit and our future survival as a group can be measured against the volume in these Reserves ( having worked in the Reserves Office of the Flag Finance Office I can speak from first hand knowledge on this ).

LRH advised many years ago that Sea Org Reserves should have sufficient in them to support the entirety of Scientology for 2 years with no future Income in that time - that includes everything ie: Staff Pay , Promotion, Research etc . This isn't just a nice idea or a nice to have it is essential. Right now we are a hell of a long way off of the target . Sooner or later the World economy will collapse and if we aren't ready for it by having all Orgs solvent and sufficient in Sea Org Reserves we are going to be in real trouble . It might interest you to know that right now Mexico , Poland, Argentina and at least two other Communist bloc countries are unable to pay massive loans owed to western banks . These Banks need the loans repaid in order to operate . As the loans can't be repaid , these banks will collapse with a chain reaction on the Economy . A run on money will then occur amongst traders and governments alike .

Right now most of the UK Orgs could possibly be declared bankrupt and closed down if all the traders got together and demanded their money NOW. Church Officers and Executives could be

Church Assets and Buildings seized for liquidation. That's the stark, plain truth of the matter and it could very easily happen. As LRH states in LRHED 74 INT 'Solvency' - quote 'The Greatest help you can be to the enemy is to permit Orgs to become Insolvent. There is no single greater threat to any org than insolvency'.

We are dealing in this briefing not only in Solvency from a local viewpoint but also Solvency on an International scale as reflected in Sea Org Reserves versus what should be there in order to support all of Scientology for 2 years (we have a hell of a way to go). One can also look at this from the staff pay side as that is the personal Solvency of the staff members themselves and this ties into the overall scene too.

As a group right now we face potential oblivion through Finance unless we move fast. The threat comes from having dinky, shrinking, out ethics orgs that are not impinging sufficiently on their environments and as a result Orgs are not making Money to pay staff adequate salary, stay solvent and send the needed funds to Management Reserves to handle the long term survival of Scientology. Ways in which we can be wiped out Financially are through: Refunds and Repayments unhandled, huge tax assessments externally through bad financial records or undone Audits, Promotional actions not forced in and the Org not making money as a result, SPs in the Org and in the field ripping the Org off through subversion and Financial irregularities etc etc. All these we can handle from the Finance Network - if we don't we face extinction as a group. Extinction as a group means extinction for everyone (you can remind those people whose moonlights support them and who don't give a Damn about Org pay of that). Attached you will find a pack of excerpted LRH issues in which he lays out how this current civilization is declining and the fact that if we fail on this Planet we've had it.

We have got our backs to the wall. Please have a look at how your Org should be operating (see Data Series 40 'The Ideal Org' and LRHED 339R and 339R-1) and how it is right now and then go to work with the post purposes of the FBO in mind to handle. We can do it and we can make things go right from the FBO N/W. LRH states in HCOPL 18.1.65 'Financial Management Building Fund Account' - it would be impossible today for a cleanly run, on-policy, up tech Org not to own its area totally in 10 years'. He also states under 'Stable Data of this PL point number 19 - 'Financial Management as contained in this policy letter, closely followed, will prevent almost all trouble and Org upsets, not just in Finance but in all other areas'.

So we can do something about the state of the Orgs, irrespective of what anybody else is doing or not doing. I count on you to do so. A terrific amount of power and trust has been given to the FBO N/W in order to get the job done - we either use that power or we lose it

Org produce flat out . You will run into counter intention in doing this at which point you can shoot the bastard who is getting in your way (without waiting for dawn) as we have found uniformly that people who have cut across the Finance Network have also been cutting across and sabotaging Org expansion and LRHED 339R . If you still can't get things moving you can shoot every third man , somewhere along the line people will start to listen . I don't care how many people we get rid of as long as we are left with the willing staff (see HCOPL 'Model Hat for an Executive' for the exact composition of the 'willing') who have the purpose to get the show on the road and the Org expanding . The same principle is also being applied internal to the Finance N/W - the show will be gotten on the road over dead bodies as needed . It is far better to have a 2 or 3 man Org (that can quickly expand to great numbers) of gung ho dedicated , totally on purpose individuals who really want to clear their community , town and country, than have it filled with a whole bunch of counter and other intentioned individuals who place more attention and importance on their own 1st and 2nd Dynamic interests than that of the group as a whole . We have to be totally ruthless on this or we lose . Get in ethics on the Org and force production to occur from your hat and we will win . That's why the Finance N/W is here .

much love

*Mark*

Lt Mark Gardner

FBO UK

Note: This briefing is confidential but I expect you to convey the spirit and intention of it in your actions .

ps: this is mainly aimed at class 4  
non so org FBOs but it is also applicable  
to you of course .
