RE: TENYAKA MEMORIAL
 ref: your dispatch 17 April 73
COORDINATING CONFERENCE ON
 HEALTH INFORMATION (CCHI)

Dear MarySue:

We have developed quite a file on these individuals. I have not forwarded the information to you as it is voluminous. This dispatch is to pass on the attached information, showing that the AMA admits to passing on information relative to Scientology to Federal and State mental health agencies, including foreign governments. This is as of 1970. The reference right below it is to the Coordinating Conference.

We have made some strides in this whole area. We have talked to one member of the Coordinating Conference who told our person that the things that were planned to carry out at those meetings were never written down and were a lot of fun, and that the entire membership had an agreement to deny everything if the information should ever leak out.

Our person has now been made Assistant Manager of the National FEB office with a good likelihood of being Manager within the next six months. This person has already been suggested by the Manager to be a National FEB representative at the next Coordinating Conference.

Our DC group has also put an individual into the Pharmaceutical Association.

Inasmuch as the tactics of the Coordinating Conference are not written down, it appears that our only chance is to be physically present at the meetings. Our boy in the Pharmaceutical Association will also be able

to assess accurately the areas of conflict we will be able to develop between the AMA and the Pharmaceutical Association, per your dispatch. See, I had not forgotten this cycle, and in fact, we have been quite active on it.

At this point, we are into such a tremendous amount of data gathering I think it would be much Dev-T to send the material up lines.

Love,

Terry
